Highly motivated Full Stack Developer who enjoys a challenge and working with others to develop amazing ideas! Extensive knowledge of HTML/CSS, JavaScript, React and system deployment. Merges prior client side start-up knowledge with coding expertise to present a streamlined UI/UX.

Technical Skills

HTML5, CSS3, JavaScript, JQuery, Bootstrap, Firebase, APIs, Node Js, Express Js, MySQL, PostgreSQL, Sequelize, MongoDB, Mongoose, React Js, React Router, Git, Test-Driven Dev

Education

The University of Texas at Austin

July 2017 - February 2018

University of Texas Coding Bootcamp - Full Stack Web Development

An intensive 24-week long boot camp dedicated to learning the MERN Stack. We built over 25 projects to learn core concepts, and collaborated with other students to build web applications from the ground up.

The University of Texas at Austin

December 2013

B.S. Corporate Communication, Minor in Business Foundations

Applications Built

Fire Board

- A full stack React app designed for the Austin Fire Department. It is designed to speed up fire station scheduling by providing an easy to use scheduler for the station chiefs. You can create new staff, toggle them to working or not, and assign them to any listed station with the click of a button
- I designed all of the front end and used Semantic UI for layout. I also built the home page, staff creation page, staff edit page, and all needed components. I also helped with the MongoDB connection.
- <https://fireboard-app.herokuapp.com/>

My Favorite Homeowner

- A full stack web application made for contractors to review the homeowners they work for. Designed to give power back to the working man, this app acts like Home Advisor or Yelp for the contractor. They can see if homeowners they give estimates to are rated highly, and adjust for the job accordingly. Homeowners want to get good reviews to receive more bids at competitive prices.
- Personally designed all front end work, and worked with team on back end. We used MySQL to store the information, and Node and Express to serve it.

Free Texas

- An online application made for individuals who want to find free outings in different Texas cities. Presents users with a simple UI to select a date and city, then lists all free events that involve food, drinks, or music for the day, along with the forecasted weather.
- I was designed all the site pages, worked on the Eventbrite API, and designed and published a Google Chrome application for a quick daily event search.

Relevant Experience

WalkThru

1/2018 - Present

Software Engineer Intern (Full Stack)

- Leading a team of interns to develop a new product feature by creating a custom algorithm to make and post “pulses” for clients during a software walk through

Signpost

8/2015 - 12/2016

Account Manager

- Worked with the product team to test updates and discuss product improvements.
- Projects included developing advertising outlets for our clients to work seamlessly with the Signpost Platform.

College Works Painting

10/2013 -

9/2014

District Manager

- Managed 12 interns in growing their personal businesses

Additional Work Experience

- Lead Estimate Manager at Tex Painting

4/2017 - Present

- Sales Representative at Signpost

1/2015 - 8/2015

- Branch Manager at College Works Painting

12/2012 - 10/2013
